**EXAM: ULTRASOUND LIVER**

**HISTORY:** Fatty liver

**TECHNIQUE:** Transverse and sagittal images performed by transabdominal approach with evaluation of the liver, pancreas, gallbladder, common bile duct, and intrahepatic ducts.

**COMPARISON:** None available.

**FINDINGS:**

**LIVER:** Normal in size and appearance. There is no suspicious liver mass. There is hepatopetal flow of the main portal vein. The liver surface is smooth. Liver measures 14.9 cm.

**GALLBLADDER:** No evidence of cholelithiasis. Normal wall thickness. No pericholecystic fluid.

**COMMON BILE DUCT:** Normal in size.

**SPLEEN:** Spleen is normal in size measuring 13.6 cm. Within the central spleen is a 7 mm hyperechoic shadowing calcification compatible with prior granulomatous disease.

**IMPRESSION:**

Normal size and appearance of the liver

7 mm splenic calcification most compatible with prior granulomatous disease.

**End of diagnostic report for accession:** 13349379

Your abdominal ultrasound results are okay other than fatty changes

Recommend to continue to limit sugars, carbohydrates in the diet, exercise regularly and maintain health body weight.

Regards

## Results

### Study Result

#### *Narrative & Impression*

COMPLETE ABDOMINAL ULTRASOUND: 8/17/2020 9:00

CLINICAL HISTORY: 63 years of age, Male, elevated liver enzymes.

COMPARISON: None.

PROCEDURE COMMENTS: Multiple transverse and longitudinal sonographic grayscale images of the abdomen were obtained, supplemented with color, power, and spectral Doppler imaging.

#### FINDINGS:

Pancreas: Visualized portions normal.

Liver length: 13.2 cm.

Liver appearance: Mild steatosis. No biliary ductal dilatation.

Portal vein: Patent with normal hepatopetal flow.

Portal vein diameter: 12 mm.

CBD: 3 mm.

Gallbladder: Normal.

Right kidney length: 11.9 cm.  
Right kidney appearance: Normal.

Left kidney length: 13.0 cm.  
Left kidney appearance: Normal.

Spleen: 13.3 cm, homogeneous in appearance.

Aorta: Normal.  
IVC: Normal.

Other findings: None.

IMPRESSION:

- 1. Fatty liver.
- 2. No gallstones.

I have personally reviewed the images for this examination and agree with the report transcribed above.
